

Content

Session 1: Computer Engineering and Applications

1. Blocking Artifacts Reduction in Compressed Data	1
	Fang Zhu
2. An Application Tool for Collecting Real Auction Data	6
	Rodel Balingit, Jarrod Trevathan, Yong Jin Lee and Wayne Read.
3. A Simple Binary Image Similarity Matching Method based on Exact Pixel Matching	12
	Mikiyas Teshome, Legesse Zerubabel and Dong-Yoon Kim.
4. Performance Evaluation of Virtualization and Non Virtualization on Different Workloads using DOE Methodology	16
	Devi Prasad Bhukya and Ramachandram S.
5. Keyword Search in P2P Network Based on Trie Tree	21
	Juan Zhu, Deqiang Jin and Siqian Mo
6. The Implementation and Analysis of Important Symmetric Ciphers on Stream Processor	27
	Ping Yao, Hong An and Mu Xu
7. An Adaptive Face Model for Real-Time Eyes and Mouth Tracking	32
	Shahrel Azmin Suandi, Shuichi Enokida and Toshiaki Ejima.
8. Study on the Lightweight Checkpoint based Rollback Recovery Mechanism	39
	Zhang Lei, Wang Rui, Dai Hao, Ma Mingkai and Li Xianghong
9. A New Survivable Heuristic Algorithm Based on Hamiltonian Cycle Protection in Multi-Domain Optical Networks	45
	Lei Guo
10. A Scalable, Distributed and Secure Position-Based Routing Protocol	51
	Liana Qabajeh, Miss Kiah and Mohammad Qabajeh
11. A cooperative transmission strategy on WSN based on virtual MIMO	57
	Wei Yu-Wei and Zuo Zong-Yi
12. Umbrella: A Component-Based Software Development Model	62
	Anurag Dixit and P.C. Saxena
13. A New Method for Designing QCA Circuits	68
	Amir Khademhosseini and Abbas Vafaei
14. Using Ontological Modeling in Multi-Expert Guiding based Learning Object Recommendation	73
	Noppamas Pukkhem and Wiwat Vatanawood

Session 2: Computer Engineering and Applications

15. A Comparative Study of Agile Projects Estimation using CAEA	78
	shilpa Bhalerao and Dr. Maya Ingle
16. Efficient Model for Detection Data and Data Scheme Tempering with Purpose of Valid Forensic Analysis	85
	Jasmin Azemović and Denis Mušić
17. The Design and Application of the Threshold Birthmark Algorithm based on Mutual Information Gain Rate	92
	LI Bin
18. A Color Face Hallucination with a Linear Regression Model in MPCA	100

	Krissada Asavaskulkeit and Somchai Jitapunkul.	
19. A Procurement Negotiation System with Fuzzy-based Intelligent Agents		105
	Shui-Shun Lin, Ying-Shen Juang, Jen-Teng Tsai and Jia-Nan Yen	
20. User-focused Automatic Document Summarization using Non-negative Matrix Factorization and Pseudo Relevance Feedback		110
	Sun Park	
21. Strategies to Reduce Email Overload		115
	Darryl Forsyth and Lloyd Jenkins	
22. A Web Collaboration Technology based Table-Top Exercise System		124
	Fahriana Abdul Karim, Khairulmizam Samsudin and Wan Azizun Wan Adnan.	
23. A Similarity-based Cellular Selection Mechanisim for Genetic algorithms to Solve Assignment Problems		129
	Hossein Rajabalipour Cheshmehgaz, Habibollah Haron and Mohammad Reza Meybodi.	
24. Framework Feature Oriented Model and Its Application in GEF Framework Modeling		134
	Tiange Zhang, Xiaochun Xiao, Leqiu Qian and Huan Wang	
25. Localization of Agricultural Vehicle Using Landmarks and Omni-directional Vision		140
	Ming Li, Kenji Imou, Shirou Tani and Shinya Yokoyama	
26. Optimizing Joint Angles of Robotic Manipulator Using Genetic Algorithm		145
	Yu Chooi@Albert Fong, Siaw Paw Koh, Chai Phing Chen, Sieh Kiong Tiong and Edwin Yih Shyang Sim	
27. Two-way Dictionary-based Lexical Ontology Alignment		151
	Ahmad Abu Shareha, Mandava Rajeswari and Dhanesh Ramachandram	
28. Performance Evaluation of 802.11 Mobility and Interference Issues		158
	Biju Issac	
29. Community Mining in Signed Social Networks –An Automated Approach		163
	Tushar Sharma, Ankit Charls and Pramodkumar Singh	
30. On demand Media streaming in P2P networks based on BitTorrent		169
	Ankit Charls, Tushar Sharma and Pramodkumar Singh	
 Session 3: Computer Engineering and Applications		
31. Optimization of Dispensing Parameter Fine Tuning Program Using Genetic Algorithm		174
	Edwin Yih Shyang Sim, Johnny Siaw Paw Koh, Sieh Kiong Tiong, Yu Chooi, Albert Fong and Chai Phing Chen.	
32. Automated Profile Vehicle Using GSM Modem, GPS and Media Processor DM642		180
	Muhammad Tahir QADRI and Syed Shafi-Uddin QADRI	
33.A Proposed Petri Nets Model for Updating XML Documents on a Multicore Architecture		185
	Alaa Wadi and Sai Peck Lee	
34. Numerical Simulation of the Ultra-high-speed Low-specific-speed Impeller Pump and Application Research in Hydraulic System		191
	Yadong Meng	
35. Angio Routing		196
	V.Prasanna Venkatesh, V.Ranjana, V.janani, R.Madhav Prashanth	
36. Modeling of Mixed Fragmentation in Distributed Database Using UML 2.0		201
	S. Jagannatha, M.Mrunalini T V Suresh Kumar, K Rajani Kanth	
37. Genetic Algorithm -Based Color Space Generation		206
	S.M.Hosseini H.Sadoghi Yazdi H.farsi	

38. Some Control Strategy relate to Congestion Control for Wireless Sensor Networks	212
Liu Yong-Min, Jiang Xin-Hua, Nian Xiao-Hong, Lu Wu-Yi	
39. FPGA Based AGREP for DNA Microarray Sequence Searching	217
Mark Oliver L. Ouano, Gabriel F. Villorente Mary Grace C. Dy Jongco, Emilyn B. Escabarte	
40. Possible Development and Future Directions of distance learning	222
Liu Yong-Min, XIAO Bi-Wu, LIU Ping-Bo	
41. Fault Proneness Model for Object-Oriented Software: Design Phase Perspective	227
Suraiya Parveen & R A Khan	
42. A Evolutionary Multiobjective Genetic Algorithm to Solve 0/1 Knapsack Problem	232
Subhra Swetanisha, Prof. Bhabani Sankar Prasad Mishra	
43. Multiplexing SIP Applications voice Packets between SWVG Gateways	237
Mosleh Abu-Alhaj, Manjur S. Kolhar, M. Halaiyqah' O. Abouabdalla' and R. Sureswaran	
44. Heat Spreading Aware Floorplan for Chip Multicore Processor	242
Liqiang He and Cha Narisu	
45. Structure Analysis And Choosing Materials For The Aerospace Multi-functional Structure Of Electronic Equipment	251
Yan Zhang, Wenyi Liu	
46. QoS providence and Management in Mobile Ad-hoc networks	256
Muhammad Ibrahim	
47. The Antecedents of Electronic Customer Relationship Management Performance (eCRM) in electronic services	262
Samsudin Wahab	
48. Enterprise mobile business platform and implement based on J2ME	266
He Ting, Xiao Wenjing	
49. Competition between Tied Product Firms and Aftermarket Remanufacturers with Spatio-Temporal Diffusion	271
Yenming J. CHEN and Jau-Wen Wang	

Session 4: Telecom Technology and Applications

50. FIFO Controller Design in MPEG/JPEG	277
Sumit Srivastava, Nameeta Sharma and Ashish Sharma	
51. Computer Aided Legal Support System - Methodology to Automatically Convert Legal Text into Cases for Building Case Base Reasoning	283
Valliappan Raman and Ayyappan Palanissamy	
52. Efficiency in the Design of a Biometric Identification System Based on Electrocardiogram Data	288
Mouhcine Guennoun	
53. Impact of Feature Selection on the Performance of Wireless Intrusion Detection Systems	293
Mouhcine Guennoun	
54. Context-Based Access Control to Medical Data in Smart Homes	298
Mouhcine Guennoun	
55. Mitigating the Security Risks of Unified Communications	303
Fernando L. Almeida, Jose M. Oliveira and Jose M. Cruz.	
56. An Investigation of Teachers' Needs on Using ICT in Teaching and Learning	308
Ailing Qiao and Nan Wang	
57. THE traffic light simulator and optimization using Genetic Algorithm	313

	Ashfaq Hussain Farooqi, Ali Munir and A. Rauf Baig.	
58. Reliability Analysis of a Fault Tolerant Buffered Switch		319
	Luisito Tabada and Pierre Tagle.	
59. Exploring Attributes for Selecting VoIP Service in Korea		326
	Jisoo Nam, Changi Nam, Seongcheol Kim and Myungbae Yeom	
60. Diversity-Rate Considerations and Precoder Designing for Spatially Correlated Perfect Space-Time Block Codes		331
	Mehdi Rahmati and Vahid Tabataba Vakili	
61. An Experimental Investigation Into The Dynamics of TCP ECN		336
	Terry Koziniec and Michael Dixon	
62. The Web-based Construction of the Regional School Learning for the Teachers' Professional Development		342
	Ailing Qiao and Nan Wang	

Session 5: Telecom Technology and Applications

63. An Intelligent Ensemble Based Systems for Breast Cancer Diagnosis		347
	M. Arfan Jaffar, Zeeshan Hayder and Anwar M. Mirza.	
64. Assessment of Visual Stress-induced Heart Rate Variability (HRV) Changes Using Non-invasive Continuous ECG Monitoring System		352
	Wanqing Wu and Jungtae Lee	
65. Selecting Suitable Semantic Web Service Composition, Using PROMETHEE Method and Non-Functional Parameters		358
	Shahab Bayati and Masoud Goli	
66. QoS and System Capacity Optimization in WiMAX Multi-hop Relay Using Flexible Tiered Control Technique		363
	Anas Bayan	
67. Analytical Study of MC-CDMA-TCM over Multi-path Rayleigh Fading Channels		369
	Samreen Amir and Muhammad Asif	
68. Support QoS Routing, Accurate State Information in MANET		375
	K. Arulanandam, Dr. B. Parathasarathy,	
69. Glaucoma Diagnosis of Morphological Processing In Optical Coherence Tomography		380
	T.R.Ganesh Babu, Dr.S.Senbaga Devi,	
70. Pricing Pitch To Optimize QoS in MANETs and Statistical Verification for its Hypothetical Measurements		385
	M.Sulleman Memon, Manzoor Hashmani, Niaz A. Memon, Niaz Memon	
71. Using the Concept of Management Information System to Improve an Effusive Intelligent Parking System		391
	Ayad Ahmed Yass Norizan Mohd Yasen	
72. New Design for Intelligent Parking System Using the Principles of Management Information System and Image Detection System		397
	Ayad Ahmed Yass, Dr. Norizan Mohd Yasin, Bilal Bahaa Zaidan, Aws Alaa Zaidan	
73. Localization in Anchor less Mobile Wireless Sensor Network		403
	Mehdi Vojdani Dr.Mehdi Dehghan	
74. The Development of Groundwater Dynamic Monitoring System based on GSAM		409
	Feng Cangxu, Liu Jun, Shi Yun, Zhao Xueliang	
75. Knots of Substitution Techniques of Audio Steganography		415

Mazdak Zamani Azizah Abdul Manaf Rabiah Ahmad

76. Designing a Thread Migration Facility for LINUX Operating System 420
Mr.G.Vijay Kumar T.V.Madhu Sudhana Rao Mr.Srinivasan.Nagaraj, Mr. K Koteswara Rao
77. Shortcut Frame Routing and Tunneling Between Wireless Bridges 430
Sasmita Behera Sudeepta Mishra

Session 6: Telecom Technology and Applications

78. Energy Efficient Cluster Based Routing Protocol for MANETs 435
Seyed-Amin Hosseini-Seno, Tat-Chee Wan, Rahmat Budiarto
79. Improving Inspection Data Quality In Pipeline Corrosion Assessment 440
Mazura Mat Din, Md. Asri Ngadi Norhazilan Mohd. Noor
80. Randomness Analysis of Pseudorandom Bit Sequences 445
Rashidah Kadir, Mohd Aizaini Maarof
81. Network Intrusion Alert Aggregation Based on PCA and Expectation Maximization Clustering Algorithm 450
Maheyzah Md Siraj, Mohd Aizaini Maarof, Siti Zaiton Mohd Hashim
82. Need to Redefine “Value” and Case for a New “Software Valuation” Technique: An Analytical Study 455
Mohammad Ramzan, Sajid Anwar, Abdul Rauf, Arshad Ali Shahid
83. An Analysis of Video Multicast in VCR Application using MANET 464
S.Vijayaragavan Dr.K.Duraiswamy
84. A Selective Trigger Scan Architecture for Low Power Dissipation and High Fault Coverage in BIST 471
R.Rajalakshmi, S.Bhuvaneshwari
85. Analysis QoS Parameters for Mobile Ad-Hoc Network Routing Protocols: Under Group Mobility Model 477
S. R. Biradar, Hiren K D Sarma, Kalpana Sharma, Subir Kumar Sarkar and Puttamadappa C
86. Implementation Stage for High Secure Cover File of Hiding Data Using Computation between Cryptography and Steganography 482
Omar Zakaria, Fazida Othman, Aos.A.Zaidan, B.B.Zaidan, Mohammed Muayad
87. Reducing Page Faults with a Self Testing Page Allocation Algorithm 490
Omid Gholami
88. Successful Implementation of CRM: The Role of Data Mining 495
Dr. Abdullah S. Al-Mudimigh, Zahid Ullah, Farrukh Saleem
89. Wavelet-Based Color Image Segmentation using Self-Organizing Map Neural Network 501
M. Arfan Jaffar, M. Ishtiaq, Ayyaz Hussain, Anwar M. Mirza
90. Automatic Skin Detection in Luminance Images using Threshold Technique 506
Tayyaba Azim, M. Arfan Jaffar and Anwar M. Mirza
91. Research on the Motion Tracking Feedforward Control of Hydraulic Winch 512
Zhou Entao
92. A Study on the Application Level and the Difficulties of the Use of Information Technology at Academic Libraries of Kerman in Iran 516
Faranak Mohsenzadeh, Rostam Mozafari

Session 7: Knowledge Discovery

93. An Efficient Algorithm for Distributed Association Rule Mining 522

	Preeti Paranjape and Umesh Deshpande	
94.	Detecting Users' Online Knowledge Sharing Behavioral Patterns in a Knowledge Management System: Using Sequential Analysis to Explore Online Knowledge Construction Process of an Online Teacher Community	529
	Huei-Tse Hou and Kuo-En Chang	
95.	More Blogging Features for Author Identification	534
	Haytham Mohtasseb and Amr Ahmed	
96.	Framework on outlier sequential patterns for outbreak detection	540
	Zalizah Awang Long, Abdul Razak Hamdan and Azuraliza Abu Bakar.	
97.	Smog Animation Simulation Based on Shape Control	546
	Tao Zhiyong, Zi Lingling and Ma Zhenhe	
98.	Towards applying Data Mining Techniques for Talent Management	550
	Hamidah Jantan, Abdul Razak Hamdan and Zulaiha Ali Othman.	
99.	An Efficient Density Based Incremental Clustering Algorithm in Data Warehousing Environment	556
	Navneet Goyal, Poonam Goyal, K venkatramaiah, Deepak P C and Sanoop P S.	
100.	Exploring Spatial Relationships For Knowledge Discovery in Spatial Data	561
	Norazwin Buang	
101.	A Review of Suboptimal Branch and Bound Algorithms	566
	Songyot Nakariyakul	
102.	Identifying ITC Patterns By Industries Using Web Content Mining	571
	Camelia Ratiu-Suciu, Florica Luban and Camelia Elena Ciolac	
Session 8: Knowledge Discovery		
103.	An Investigation into Data Mining Approaches for Anti Money Laundering	578
	Nhien An Le Khac, Sammer Markos and M-Tahar Kechadi	
104.	Internal Symmetry Nets for Back Propagation in Edge Detection	583
	Guanzhong Li	
105.	Cache-conscious Feature Construction for Breast Abnormality Detection	589
	visanu changniam and Juggapong Natwichai	
106.	Semantic Extraction from Texts	595
	Shaidah Jusoh and Hejab Al Fawareh	
107.	Agent-based Knowledge Mining Architecture	602
	Shaidah Jusoh and Hejab Al Fawareh	
108.	Stacking Approach for a Robust Prediction Model of Visualized Data Sets	606
	Shaidah Jusoh and Megat Norulazmi Megat Mohamed Noor.	
109.	Eccentric Test Data Generation for Path Testing Using Genetic Algorithm	613
	Punam Mishra Bhabani Shankar Prasad Mishra	
110.	A Survey of Computer Added Facilities Management in Malaysian Building Industry	617
	Syahrul N. Kamaruzzaman & Azlan Shah Ali, Aini Jaapar & Emma M. A. Zawawi	
111.	Entropy Evaluation of Uncertainty in M&A Transaction System	622
	Changbing Tong, Qiushen Zhang, Jinchuan Ke	
112.	Online Auction Software Fundamentals	627
	Jarrod Trevathan, Wayne Read and Rodel Balingit	
	<i>Author Index</i>	631
