

Content

Session 1: Machine Learning and Computing

1. Comparative Analysis of Edge Detection Techniques for extracting Refined Boundaries 1
Parvinder Singh Sandhu, Mamta Juneja and Ekta Walia
2. A Novel Model-based Predictive Wavelet Network Strategy for Control of Spark Injection Engines 11
Javad Abdi, Hossein Ahmadi Noubari and Hossein Borhanifar
3. Theoretical Analysis of Inverse Generalized Exponential Models 18
M. Shuaib Khan
4. CPDA Based Fuzzy Association Rules for Learning Achievement Mining 25
Jr-Shian Chen, Hung-Lieh Chou, Ching-Hsue Cheng and Jen-Ya Wang
5. Study of Permanent Magnet Direct Current Motor Design Expert System 30
Ran Zhang, Xiuhe Wang and Dongwei Qiao
6. Feature Selection as an Improving Step for Decision Tree Construction 35
Mahdi Esmaeili and Fazekas Gabor
7. Catfish Binary Particle Swarm Optimization for Feature Selection 40
Li-Yeh Chuang, Sheng-Wei Tsai and Cheng-Hong Yang
8. Information Fusion Technique for Fuzzy Time Series Model 45
Jia-wen Wang and Jing-Wei Liu
9. Improving Differential Evolution Algorithm with Activation Strategy 50
Zhan-Rong Hsu, Wei-Ping Lee and Ching-Wei Chien
10. Modified the Performance of Differential Evolution Algorithm with Dual Evolution Strategy 57
Ying-Chih Wu, Wei-Ping Lee and Ching-Wei Chien
11. Improving the Performance of Differential Evolution Algorithm with Modified Mutation Factor 64
Ching-Wei Chien, Zhan-Rong Hsu and Wei-Ping Lee
12. Domain Linker Region Knowledge Contributes to Protein-protein Interaction Prediction 70
Nazar Zaki, Piers Campbell
13. Extending Point Pattern Analysis to the Temporal Comparison of Point Patterns 75
Li Li

Session 2: Machine Learning and Computing

14. Research on Sentence Relevance Based on Semantic Computation 80
Jinzhong Xu, Xiaozhong Fan and Jintao Mao
15. A Unified CBR Approach for Web Services Discovery, Composition and Recommendation 85
Zhaohao Sun, Jun Han and Dianfu Ma
16. Outlier Diagnostics in Logistic Regression: A Supervised Learning Technique 90
A. A. M. Nurunnabi and Mohammed Nasser
17. Performance Metrics for Information Security in Intelligent Grid 96

Razvan Bogdan, Versavia Ancusa and Mircea Vladutiu

18. A Neighborhood Structure for the CMST Problem 101
Jun Han, Zhaoguo Li, Xiang Long, Dianfu Ma and Ming Lei
19. Based on Knowledge Management Perspectives to Construct Knowledge Network Learning Diagnosis Analysis System 107
Tung-lin Chuang and Kwo-ting Fang
20. Semi-supervised Multi-label Learning Algorithm Using Dependency Among Labels 112
Qu Wei, Zhang Yang, Zhu Junping and Yong Wang
21. The Evolving of Concept System based on Representation Redescription 117
Hui Wei and Xixu Fu
22. Gas Identification by Using a Cluster-k-Nearest-Neighbor 123
Samir Brahim Belhaouari and Riadh Abaza
23. A Neuro-Fuzzy Application to Power System 131
Ahmed M. A. Haidar, Azah Mohamed, Norazila Jaalam, Zulkeflee Khalidin and M. S. Kamali
24. Investigating the Suitability of a .NET/SQL Server Approach for Developing a Remotely Accessible Information System for Vehicle Inspectors 136
Justin Kumar, Zenon Chaczko, Bruce Moulton and Venkatesh Mahadevan

Session 3: Machine Learning and Computing

25. A New Digital Signature Algorithm 141
Erfaneh Noorouzi, Amir Reza Estakhrian Haghighi, Farzad Peyravi and Ahmad Khadem zadeh
26. An efficient feature reduction technique for intrusion detection system 147
Shailendra Singh, Sanjay Silakari and Ravindra Patel
27. A Chinese Domain Term Extractor 154
Jibin Fu, Zhifei Wang and Jintao Mao
28. The Study of Monocular-Vision-Based on Moving Object 159
Xi Lin and Liu Dong
29. Cellular Learning Automata-based Graph Coloring Problem 163
Alireza Enami Eraghi, Javad Akbari Torkestani and Mohammad Reza Meybodi
30. Solving the Bandwidth Multicoloring Problem: A Cellular Learning Automata Approach 168
Alireza Enami Eraghi, Javad Akbari Torkestani and Mohammad Reza Meybodi
31. Cellular Learning Automata-based Channel Assignment Algorithms for Wireless Mobile Ad Hoc Networks 173
Alireza Enami Eraghi, Javad Akbari Torkestani, Mohammad Reza Meybodi and Amir Hosein Fathy Navid
32. D-S Evidence Theory in the Application of Turbine Fault Diagnosis 178
Xia Fei, Zhang Hao, Xu Longhu and Peng Daogang
33. Clustering Suggestion for Chinese News Web Pages from Multi-media Sources 183
Deng-Yiv Chiu and Ya-Chen Pan
34. UML Generated Test Case Mining Using ISA 188
Lilly Raamesh and G.V. Uma

35. AJAX based Web Services Invocation: Higher Performance & Bandwidth Utilization 193
Rohit Dhand

Session 4: Machine Learning and Computing

36. Offline Signature Recognition Based on Contourlet Transform 198
Mina Fakhrai, Hamid Reza Pourreza, Reihane Moarefdost and Shabnam Shadroo
37. A Hybrid Simplex Search and Bio-Inspired Algorithm for Faster Convergence 203
Massudi Mahmuddin and Yuhanis Yusof
38. Interesting Target Detection and Matching Algorithm Based on Phase Information 208
Zhitao Xiao, Jun Wu, Lei Geng, Jianming Wang, Nini Xu and Zhigui Lin
39. Biomimetic Approach for Design of Multifingered Robotic Gripper (MRG) & Its Analysis for Effective Dexterous Grasping 213
Ohol S.S and Kajale S.R
40. Euclidean-based Feature Selection for Network Intrusion Detection 222
Anirut Suebsing and Nualsawat Hiransakolwong
41. Optimizing ANN's Architecture for Audio Music Genre Classification 230
Panagiotis S. Stergiopoulos and Odysseas B. Efremides
42. Do We Really Need to Adopt Electronic Banking? 234
Zaid Al-Baghdadi, S.A.M. Rizvi and Halima Sadia Rizvi
43. An Improved Genetic Algorithm for Operon Prediction 239
Li-Yeh Chuang, Ruei-Hung Tsai and Cheng-Hong Yang
44. An Improved Binary Particle Swarm Optimization with Complementary Distribution Strategy for Feature Selection 244
Cheng-Hong Yang, Chih-Jen Hsiao and Li-Yeh Chuang
45. Accelerated Chaotic Particle Swarm Optimization for Data Clustering 249
Cheng-Hong Yang, Chih-Jen Hsiao and Li-Yeh Chuang
46. Fuzzy Kohonen Clustering Network for Color Image Segmentation 254
Nahla Jabbar, S.I.Ahson and Monica Mehrotra

Session 5: Machine Learning and Computing

47. A Biometrics Based Secure Communication Scheme for Bluetooth Environment 258
Mostafa Akhavan-E-saffar
48. Secure Data Transmission for ATA-based Mobile Virtual Storage System 273
Chee-Min Yeoh, Bee-Lie Chai, Hoon-Jae Lee and Hyotaek Lim
49. Indoor 3D Virtual World Representation for Multi-user Tracking System on Mobile Device 279
Boon Giin Lee, Kyeong-Hoon Do and Hoon-Jae Lee
50. Development of Efficient Query Processor in Cell Phone for Sensor Data Processing Over a WSN 284
Sing-Hui Toh, Hoon-Jae Lee and Kyeong-Hoon Do
51. State and Path Analysis of RSSI in Indoor Environment 289
Chuan-Chin Pu and Hoon-Jae Lee
52. New Algorithm to Improve the Coexistence between IMT-Advanced Mobile Users and 294

Fixed Satellite Service

Lway Faisal Abdulrazak, S.K.Abdul Rahim and Tharek Abd. Rahman

53. Internet Financial Reporting in Malaysia 302
Asmah Abdul Aziz, Nur Nariza Mod Ariffin and Intan Salwani Mohamed
54. An Equation Based Rate Control for Adaptive Video Streaming over Cellular Networks 307
Abdolkarim Mardanian Dehkordi and Vahid Tabataba Vakili
55. Detecting Inconsistent Firewall Configuration Rules Using Range Algorithm 314
Ahmed Farouk, Hamdy N.Agiza and Elsayed Radwan
56. Performance Analysis of Range Algorithm 319
Ahmed Farouk, Hamdy N.Agiza and Elsayed Radwan
57. Growth and Ellipsometric-spectroscopy of Semiconducting Ca₂Si Thin Films 324
Qingquan Xiao, Quan Xie, Kejie Zhao and Zhiqiang Yu

Session 6: Information and Network Technology

58. An Optimized Lifetime Model using Energy Holes Reduction near Sink's Locality of WSN's 328
Atiq Ur Rahman, Halabi Hasbullah and Omar Usman Khan
59. SPINS: Security Protocols for Sensor Networks 333
Fasee Ullah, Tahir Mehmood, Masood Habib and Muhammad Ibrahim
60. QoS Providence and Management in WiMAX using PMP Mode 338
Muhammad Ibrahim, Tahir Mehmood, Fasee Ullah and Masood Habib
61. An Intelligent Visualized Decision Toolbox IVDT for Muzzy Decision Maker 343
Hawaf Abdalhakim and Mohamed Abdelfattah
62. Storing Scheme for State Machine Based Rule Base of Genetic Feedback Algorithm Based Network Security Policy Framework Depending on Memory Consumption 349
Atish Mishra and Prakash Kumar
63. A Secured Cryptographic Messaging System 354
Hassan Mathkour, Ghazy Assassa, A. Al-Muharib and A Juma'h
64. Bandwidth Reservation and Admission Control Based on Mobility Predictions in Cellular Mobile Networks 360
Esmat Shoja and Vahid Tabataba Vakili
65. Using neural Networks Expert System to Predict Protein Thermostability 368
Esmail Ebrahimie, Mansour Ebrahimi, Tahereh Deihimi and Mahdi Ebrahimi
66. An Internet GIS Application for a Prototype of Water Resource Infrastructure 374
Prattana Deeprasertkul and Royol Chitradon
67. Novel Spatial Domain Reversible Information Hiding Technique for Content Authentication 379
Fahad Ali Usmani and Ekram Khan
68. Robust and Imperceptible Image Watermarking using Full Counter Propagation Neural Networks 385
Summrina Kanwal Wajid, M. Arfan Jaffar, Wajid Rasul and Anwar M. Mirza

Session 7: Information and Network Technology

69.	The Sequential Platform Competition in the Two-sided Market with Cases from the E-payment Industry	392
	<i>Weijun Tang, Hongmin Chen and Li Xu</i>	
70.	A Supervisory System to Detect Suspicious Behavior in Online Testing System	398
	<i>Syed Ahmar Qamar and M. Arfan Jaffar</i>	
71.	Identifying Required Data for a Successful Dynamic Packaging System	405
	<i>Amir Saffarian and Fereidoon Shams</i>	
72.	Correcting Noisy Ciphers in CBC mode	411
	<i>Nabil Mirza, Ziad Osman, Rached Zantout and Mohamed El-Sayed</i>	
73.	The Number of the Two Dimensional Run Length Constrained Arrays	415
	<i>Talip Atajan, Naohisa Otsuka and Xuerong Yong</i>	
74.	The Impact of ICT and Driving Factors of Internet User's Buying Behavior in Malaysia	420
	<i>M. Jehangir Khan, P. D. D. Dominic and Alamgir Khan</i>	
75.	Robust Grid Resource Broker Strategy for Economy Based Grid	425
	<i>Babar Nazir and Mohd Fadzil Hassan</i>	
76.	Classification Rule Mining through SMC for Preserving Privacy: A Review	431
	<i>Alka Gangrade, Durgesh Kumar Mishra and Ravindra Patel</i>	
77.	SV PWM Pattern Generator using Field Programmable Gate Array Implementation	435
	<i>Prawin Angel Michael and N. Devarajan</i>	
78.	Enhancing the QoS of Wireless Ad Hoc Networks by Improving the Throughput	440
	<i>L.K.Shoba, V. Berlin Hency and D. Sridharan</i>	
79.	Bio-feedback Based In-flight Music System Design to Promote Heart Health	446
	<i>Hao Liu, Jun Hu and Matthias Rauterberg</i>	
80.	College Information System Research Based on Data Mining	451
	<i>An-yi Lan and Li Jie Li</i>	

Session 8: Computer Research and Development

81.	Improvement Bluetooth Authentication and Pairing Protocol Using Encrypted Key Exchange and Station-to-Station –MAC Protocols	457
	<i>Mostafa Akhavan and Vahid Tabataba Vakily</i>	
82.	IPTV Using DM642 Multimedia Processor and Bluetooth	466
	<i>Muhammad Tahir Qadri, Irfan Ahmed Usmani, M. Yasir Khan and S. Noman Mehmood</i>	
83.	2D ECG Compression Using Optimal Sorting and Mean Normalization	472
	<i>Young Joo, Gyu-Bong Lee and Kil-Houm Park</i>	
84.	Software Risk Management and Avoidance Strategy	477
	<i>Hassan I. Mathkour, Basit Shahzad and Sami Al-Wakeel</i>	
85.	Design of a Remote Image Monitoring System Based on GPRS	482
	<i>Yongqiang Zhang, Guozhen Zhao and Yongjian Zhang</i>	
86.	The Online Digital Talking Books Production System Using Audio Streaming Media Technology	487
	<i>Settachai Chaisanit and Surachai Suksakulchai</i>	
87.	Virtual Reality Online Museum for Packaging	493
	<i>Ratchadawan Nimmual and Surachai Suksakulchai</i>	

88. Static Bandwidth Allocation on Optical Networks	498
<i>Arash Habibi Lashkari, Hossein Rouhani Zeid Anloo and Ahmed A. Sabeeh</i>	
89. Router-Based Bandwidth Allocation on Optical Networks	504
<i>Arash Habibi Lashkari, Daryoush Naghneh Abbaspour and Shahram Jazayeri</i>	
90. Windows-Based Bandwidth Allocation on Optical Networks	510
<i>Arash Habibi Lashkari, Shahram Jazayeri and Daryoush Naghneh Abbaspour</i>	

Session 9: Computer Research and Development

91. Bioinformatics and Protein Engineering; Presenting a Few Applications Employed in Our Labs	516
<i>Mansour Ebrahimi, Esmail Ebrahimie, Ahmad Tahmasebi, Narjes Rahpeyma and Sarvestani, Tahereh Deihimi</i>	
92. An Improved Node Partitioning Algorithm for the CMST Problem	521
<i>Jun Han, Ming Lei, Dianfu Ma, Xiang Long and Yaling Huang</i>	
93. Some Observations on the Nature and Computer-based Representation of Legal Documents and Their Link Data	527
<i>John Murphy and Robert Steele</i>	
94. Software Performance Modeling in Distributed Computer Systems	532
<i>Shantharam Nayak and Dinesha K V</i>	
95. Dynamic Intra - network Spectrum Sharing for Cognitive Radio Networks	538
<i>Saleem Aslam, Waleed Ejaz, Najam ul Hasan and Naveed Ejaz</i>	
96. Overview of Text Documents Classification	544
<i>Aurangzeb Khan, Baharum B. Baharudin and Khairullah Khan</i>	
97. Mathematical Simulation for 3-Dimensional Temperature Visualization on Open Source-based Grid Computing Platform	553
<i>Norma Alias, Noriza Satam, Zarith Safiza Abd. Ghaffar, Roziha Darwis, Norhafiza Hamzah and Md. Rajibul Islam</i>	
98. Integrated Coarse-Fine Scheme for Text Information Extraction from Instructional Videos	559
<i>Ahmed Hamad, Said El-Ghonaimy, Taysir Soliman and Marwa Afifi</i>	
99. Several Tokens Distributed Mutual Exclusion Algorithm in a Logical Ring Network	567
<i>Ousmane Thiare</i>	
100. Optimal Control of Discrete-time Linear Stochastic Dynamic System with Model-reality Differences	573
<i>Sie-Long Kek and Mohd Ismail Abdul Aziz</i>	
101. Regression Analysis the Role of Information and Communication Technologies in Improving Food Accessibility of Iranian Rural Households	579
<i>Farhad Lashgarara</i>	
102. Transmission Mechanism for Refurbishment Managers in Routine Practice	585
<i>Mohammad Affendy Omarkin, Noraziah Ahmad</i>	
<i>Author Index</i>	589
